KERCKHOFF LABORATORIES  
OF BIOLOGY

September, 25, 1950.

Dear Dr. Lederberg,

I would very much appreciate to get some of your K 12 strains, i.e. any strain carrying the characters  $T^{-}L^{-}B^{-}Lac^{+}$  being at the same time resistant to T1 or T6; if both strains are available I would be very glad to get both. In addition, I would be very grateful if I could get one of your Het strains and, if possible Cavalli's "high frequency" (hf) strain.

Up to now, I only worked on problems of developmental physiology in *Drosophila* and on some aspects of chemical mutagenesis in *Drosophila*. These next two years I shall work in Dr. Delbrück's laboratory and probably start some experiments on recombination in bacteria.

I shall send you some of my reprints on chemical mutagenesis under separate cover. I would be very grateful if you might also send me some of your reprints on recombination in bacteria if you have still any copies available.

Sincerely yours,

*Marguerite Vogt*
